

Remarks/Arguments

Claims 6 and 41 were originally filed providing different amino acid sequences associated with sequence identifiers. As pointed out in the office action, the amino acid sequences did not correspond to the provided identifiers in the originally filed claims. The present amendment corrects the deficiency noted by the examiner. The sequence identifiers for the different sequences in claims 6 and 41 are already present in the filed sequence listing.

Please charge deposit account 13-2755 for fees due in connection with this amendment. If any time extensions are needed for the timely filing of the present amendment, Applicants petition for such extensions and authorize the charging of deposit account 13-2755 for the appropriate fees.

Respectfully submitted,

By 
Sheldon O. Heber
